GIDEON

Global Infectious Disease and Epidemiology Network

"Anyone who has never used a good artificial intelligence program would do well to start at the top with GIDEON." JAMA 1997; 277:1085

"GIDEON ... provides remarkable assistance in diagnosing infectious diseases. No ordinary artificial intelligence program...This important program deserves widespread attention." JAMA 2002; 2433-34

"... the correct diagnosis appeared in the differential diagnosis list for 94.7% of 495 cases..." Infec Dis Clin Prac 1998; 7:383-386

"...An algorithm links key clinical features and epidemiological profiles of individual patients to give a ranked differential diagnosis that is very complete... It is the most comprehensive tropical medicine database available." Clinical Infectious Diseases 2001; 32:757-765

GIDEON

GIDEON IS AN EASY TO USE, COMPREHENSIVE WEB OR CD-BASED TOOL THAT:

- Helps you overcome information overload
- Saves you time through quick access to a vast knowledge database
- Is used by hundreds of institutions in over 40 countries

GIDEON MANAGES INFECTIOUS DISEASE KNOWLEDGE BY PROVIDING:

- A reliable diagnosis or simulation of clinical problems based on patient presentation and epidemiology
- A ranked differential diagnosis that considers: patient symptoms, travel and exposure history, incubation period, laboratory test results, immune status, bio-terrorism
- Simultaneous comparison of clinical and laboratory features for two or more diseases
- An explanation of why a certain disease is not included in the differential diagnosis
- Custom Notes section to add personal or institutional information
- Up-to-date epidemiological information including agent, vector, vehicle, and reservoir
- Current distribution and country specific information for over 300 diseases in more than 200 countries

Why Not

Personal Notes

GIDEON IMPROVES QUALITY OF HEALTH CARE AND INCREASES THE SPEED AND ACCURACY OF YOUR DIAGNOSIS BY:

- Rapidly eliminating diseases that are inconsistent with clinical and epidemiological presentation
- Helping you manage illness within the ever-increasing pool of travelers, immigrants, students, corporate employees and military personnel
- Quickly identifying diseases requiring strict isolation or infection control measures and facilitating prompt initiation of therapy

GIDEON PROVIDES ACCESS TO THERAPEUTIC INFORMATION WHICH INCLUDES OVER 300 DRUGS AND VACCINES WORLDWIDE VIA ACCESS TO:

- A complete list of drugs used to treat a disease, indicating the drug(s) of choice
- The generic names for over 6,200 proprietary drugs and corresponding trade names
- Complete warnings about toxic side effects by symptom and drug interactions by drug
- Practical information on drugs used to treat infectious diseases including typical adult and pediatric dosages, mechanism of action, CSF penetration, biliary excretion

GIDEON IMPROVES THE PROVISION OF DRUG THERAPY BY:

- Quickly identifying appropriate treatment strategies for any infectious disease
- Helping avoid side effects and drug interactions
- Defining the role of drugs in adverse events, particularly in patients on multiple medications

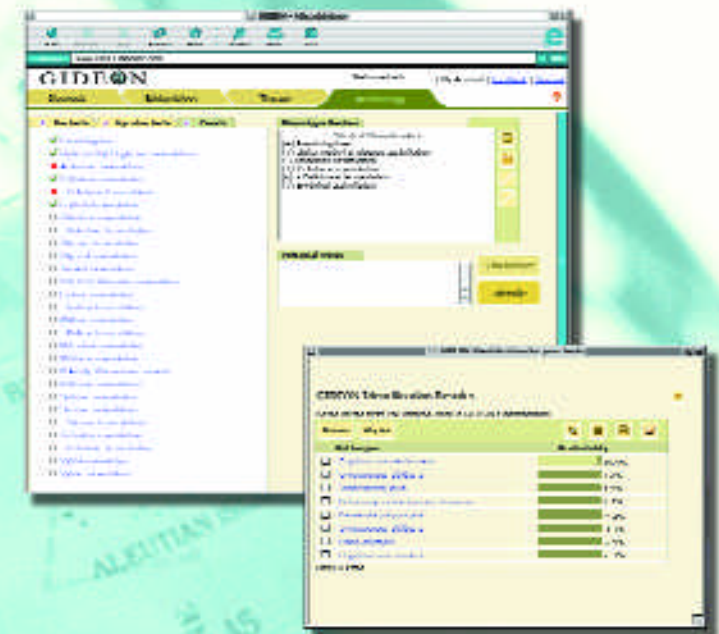

GIDEON AIDS IN MICROBIOLOGY BY PROVIDING:

- A ranked microbial identification based on any combination of phenotypic laboratory tests
- A side-by-side comparison of any group of organisms
- Why not function that explains why a certain organism was omitted from the microbial identification

Compare

Why Not

GIDEON IMPROVES TEACHING AND DIAGNOSIS BY:

- Helping you identify any bacterium, mycobacterium, or yeast; or contrast two or more organisms
- Minimize tests needed and save money by determining which laboratory test(s) to perform

GIDEON has been continually updated throughout the past decade using all relevant citations appearing in monthly MEDLINE searches, W.H.O. publications, meeting abstracts, user feedback, National Health Ministry reports, and peer-review journals.

GIDEON WEB REQUIREMENTS:
Either Netscape 6.0 or Internet Explorer 5.0 and above
Windows, Mac, Linux

GIDEON QUARTERLY CD REQUIREMENTS:
Windows 95, 98, ME, NT, 2000, XP

Subscribers include hospitals, medical libraries, medical schools, private practitioners, health departments, government and travel clinics.
