

"S" IS FOR SHRINGS

SHRINGS ON OUR FINGERS,

SHRINGS ON OUR TOES!

SHRINGS ON OUR PLATE

CLEAR SO IT SHOWS.

SHRINGS GO ON WET

AND SHRINK AS THEY DRY,

SEALING THE CULTURE

AS EASY AS PIE.

SHRINGS KEEP PLATES MOIST

YET THE CULTURE STILL BREATHES

!

WHAT COULD BE BETTER

THAN SHRINK SEALS LIKE THESE ?

WET SHRINGS -place around the plate and allow to dry. Opaque Shrings turn clear as they shrink to a tight fit that protects and keeps the plate moist while allowing air permeation for the culture. Available for 100mm plates. Packed in special easy-to-open flip-top jar. Clear jar makes it easy to see how many are left.

288 EACH -BV400

432 EACH -BV432

RS483- Stretch tape is 1 inch wide and 36 yards long. Ideal for securing those odd size plates such as 60mm mycology plates. Easily removed for access.

DRY SHRINGS- Use hair dryer or heat gun to shrink immediately-no waiting for drying.

BH350 - for 100 mm plates. / 250 each

BH351 - for 150 mm plates / 250 each

BHNEG1 - Variable temperature heat gun is faster than a hair dryer. It will stand upright on its base or hang and is ideal for shrinking dry SHRINGS.
